

Use MySQL database in Python

PyMySQL its a pure python client library, you can install using pip install PyMySQL (find documentation at <https://pymysql.readthedocs.io/en/latest/>).

The following is a simple example to demonstrate how to use the library.

```
#!/usr/bin/env python from __future__ import print_function import pymysql
conn = pymysql.connect(host='localhost', port=3306, user='root', passwd='',
db='mysql') cur = conn.cursor() cur.execute("SELECT Host,User FROM user")
print(cur.description) print() for row in cur: print(row) cur.close() conn.close()
```
